

FOOD 4 ALL

- Let students vote for food they want every day.
- Food options cycle through so there is no repeat for foods until other food is chosen.
- There are 2 categories, main dish and allergy free. Pick 1 from each.
- Gives cafeteria staff winning food idea.
- Links with student's id and allergy information to say if each food item is allergy friendly to them
- Makes students happy as well as healthy, letting them perform better in school.

Data collected:

- ID (for each individual vote)
- Allergy information (to warn about allergies)

Why should we do this?

Us at the cafeteria believe in making students happy, but also feed them to be ready to learn. This app will achieve both! Currently the food isn't only not good for learning but also not voted upon. This app will change this.

Q/A

Q: What if kids don't have a phone? A: It's also on chromebooks!

Q: What about kids with allergies? A: there will be an allergy free item every day as well.
